Saleh Shojaei
Senior Front-End Developer

ShojaeiSaleh@gmail.com | +98 917 048 5776 | Blog | Linkedin | Github | Iran, Mazandaran

Profile

As a front-end developer, JavaScript and web technologies are of interest to me.

I enjoy creating stuff on the internet, and I'm also adept at picking up new ideas and comprehending structures.

Professional Experience

Senior Front-end developer, *Shab* 🔗   2021 Jul – 2022 Aug
Tehran

Shab is a company active in the field of short-term rental accommodation in Iran.
We rewrote the entire product using NextJS to achieve the best possible performance and SEO. The challenges of rebuilding a large working product with **millions of active users** were instructive for me
NextJS, React, Typescript, MUI, Redux, Axios

Senior Front-end developer, *Hubber* 🔗   2020 Nov – 2021 Jul
Remote

Hubber is a chat application for businesses.
Using React, MUI, Typescript, and Socket IO, we were developing two main products for organization panels and messaging widgets that can be installed on customers' websites.
React, Typescript, MUI, SocketIO, Redux

Course designer, *Quera* 🔗   2020 May – 2020 Nov
Tehran

Quera is an Online Programming Skill Assessment in an Algorithmic and Technologic manner.

We designed the React course at Quera. This gave me useful experience with both the beginner training method and the course design challenges.
React, Jest, React-testing-library, react-router-dom

Front-end team lead, *Jihaat* 🔗   2018 Dec – 2020 Nov
Shiraz

Jihaat was a media and software design agency.

Jihaat's front-end team was established by me.
In addition, I served as a mentor in two unique internships organized by Jihaat; following each of these courses, new colleagues were added to our group. In addition, I researched and investigated the use of different technologies, as well as collaborated with the product manager and other team members on the team's processes.
React, MUI, Micro-frontend, SSR

Front-end developer, *Mahbaan*   2018 Jul – 2018 Dec
Shiraz

Mahbaan was a start-up that offer services to insurance offices.
As a front-end developer, I created websites, widgets, and tools for calculating and selling insurance packages for multiple Iranian insurance companies.

React, Bootstrap, Sass, SPA

Full-Stack developer, *Catiga*   2017 Aug – 2018 Jul
Catiga was a commercial complex where I worked as a full-stack developer on its   Shiraz
software development team, developing accounting and warehousing software.
PHP, Laravel, JQuery, cPanel, Bootstrap, TelegramBot

Freelancer   2015 May – 2017 Aug
My first source of income was working as a freelancer. I developed programs for fun.   Remote
Initially, I used PHP, JavaScript, SQL, Basic4Android, bootstrap, and other tools to create
an app and video store for Android.

The internet was a great hobby for me at the time, and it has since grown in popularity.

Honors

Candidate of Iran Web Festival, *iwmf* 🔗   2015 Mar
When I was a teenager, my friends and I collaborated on Oxygen Play Android Store, a
small startup that we used in school and forums.

Founder of FrontChapter, *FrontChapter* 🔗   2020 Dec
Front Chapter is an online meeting for front-end developers that I founded in 2020 and
through which I met many professional colleagues.

We also hold annual conferences to broaden the community, with prominent Iranian
technology companies participating.

Quera Skillup, *Quera* 🔗   2022 Jun
This special front-end event was held in collaboration with Quera and Digikala, and I had
the privilege of speaking alongside my expert colleagues.

Free and Open Source Software Conference, *Karaj LUG* 🔗   2021 Mar
Free software conference with active LUGs from all over Iran.

I spoke about open-source licenses at this conference and helped organize it.

Software Freedom Day, *Fars Governorate*   2019

Attending the Ubuntu Release Celebration, *University of Isfahan*   2018

Attending Software Freedom Day, *Sharif University of Technology*   2017
